

Animal Behavior Vocabulary Terms

- Behavior
- Innate Behavior
- Learning
- Habituation
- Classical Conditioning
- Operant Conditioning
- Insight Learning
- Imprinting

Notes from Reading

- Provide three examples of innate behaviors
- Provide an example of habituation
- Provide an example of classical conditioning
- Provide an example of operant conditioning
- Provide an example of insight learning
- Provide an example of imprinting
- Which aspect of imprinting is innate?
- Which aspect of imprinting is learning?

Notes or Terms from Power Point

- Reflex
- Fight or Flight
- Photo-Taxis (Positive and negative)
- Chemotaxis (Positive and negative)
- What advantages do learned behaviors provide?
- Explain how Pavlov's experiment worked
- How else is operant condition described?
