

Identifying Soil Texture Activity

Determine the soil type by finding the percentage of the sand on the grid, then find the percentage of either the silt or the clay. Follow the lines for both until they meet. The section of the grid in which they meet will be the type of soil.

1. 30% clay, 20% silt, 50% sand = Sandy Clay Loam
2. 20% clay, 40% silt, 40% sand = Loam
3. 60% clay, 10% silt, 30% sand = Clay
4. 20% clay, 60% silt, 20% sand = Silt Loam
5. 90% clay, 10% silt, 40% sand = Clay
6. 40% clay, 10% silt, 50% sand = Sandy Clay
7. 20% clay, 40% silt, 40% sand = Loam
