

Cell Structure

Across

3. Cells that do not contain a nucleus
5. Stores genetic information (DNA)
6. Site of cellular respiration (Energy)
8. Stores water, nutrients, and other material
10. Produces ribosomes
11. Site of photosynthesis
12. Apparatus Sorts and packages proteins
13. Cleans up the cell with digestive enzymes

Down

1. Provides structure to plant cells
2. Provides structure to animal cells
3. Controls what enters and leaves the cell (maintains homeostasis)
4. Helps transports material within the cell
7. Site of protein synthesis
9. Cells that contain a nucleus
