

Ecosystem Outdoor Lab

Name (s)

What type of climate is associated with the ecosystem around the school?

List all of the abiotic factors associated with this ecosystem:

How would you describe the school's ecosystem? (Forest, wetland, grassland, urban, suburban, farmland, rural, mixed – name the ones that are mixed).

Would you say there has been a lot of human disturbance to the natural conditions of this ecosystem?

What is the history of the school's ecosystem? (How was the land used before?)

What type of plants and animals would you expect to live here, if no humans had influenced this ecosystem at all?

List all of the different types of living organisms you see (Biotic factors):
