

# Global Climate Change

## Vocabulary Terms

- Climate
- Keeling Curve
- Ice Core Data
- Greenhouse Effect
- Greenhouse Gases
- Industrial Revolution
- Fossil Fuels
- Combustion

## Notes

- Why have levels of CO<sub>2</sub> in the atmosphere increased since the early 1800's?
- In what two ways has deforestation of the world's rainforests led to increased levels of CO<sub>2</sub> in the atmosphere?
- Which countries release the most CO<sub>2</sub>?
- What practices in the US emit the most CO<sub>2</sub>?
- How much is the average global temperature expected to change?
- Will it get warmer everywhere?
- What are the expected impacts from global climate change?
